

INVEST IN THE NEXT GENERATION OF ENGINEERS.

Gold Rush is a community FIRST Robotics Competition team forming now in Colma, serving the San Francisco Peninsula. Sponsors provide workshop equipment, robot parts, competition costs, and the resources needed to build a sustainable community robotics program. Sponsorships and agreements are made with Colma Robotics Foundation.

WHAT SPONSORSHIP PAYS FOR

A place to build

Workshop tools, safety gear, storage, and equipment so students can fabricate parts rather than only order them.

The robot

Motors, control systems, electronics, aluminum, and the spare parts that keep a machine running through competition.

The season

Event registration, travel, and the running costs of a program built to return for a second season and a third.

SPONSORSHIP LEVELS

Recognition below is planned for our inaugural season, and exact placement is confirmed with you when you sponsor. Shirt and robot recognition is confirmed by January 15. Custom packages are welcome.

LEVEL	AMOUNT	PLANNED RECOGNITION
Community Supporter	\$500 – \$999	Thank-you on our website when we publish a sponsors list
Bronze	\$1,000 – \$2,499	+ Logo on team shirt (when shirts are ordered)
Silver	\$2,500 – \$4,999	+ Pit banner and open-house invitation (when we compete)
Gold	\$5,000 – \$9,999	+ Logo on competition robot; demo visit when scheduling allows
Presenting Partner	\$10,000+	+ Top billing and presenting-sponsor title

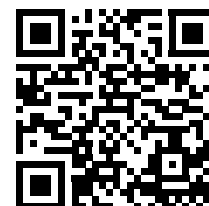

In-kind sponsorship counts at the same levels: tools and shop equipment, robot parts, raw materials, and electronics, machining, fabrication, welding, or 3D printing, printing, signage, and team shirts, transportation to competitions. If you have workshop space, fabrication capacity, or another offer that could help, tell us — we would rather hear it than guess.

HOW TO START

Scan the code for levels, in-kind options, and the sponsor form.
