

IT TAKES A COMMUNITY TO BUILD A COMMUNITY ROBOTICS TEAM.

Money is one way to help, and it is not always the most useful one. Gold Rush is a community FIRST Robotics Competition team being built in Colma for Peninsula students, and a lot of what we need is already sitting in local shops, offices, and garages — along with the people who know how to use it.

WAYS TO PARTNER

Provide space

A team needs somewhere to build. Workshop, warehouse, flex, or shared space, including temporary or seasonal.

Share expertise

Engineers, programmers, machinists, and designers make an enormous difference. A few hours in build season counts.

Equipment or services

Tools, materials, electronics, machining, printing, or transportation. If students can build with it, we can use it.

Connect us

Often the most valuable thing anyone gives us is an introduction to a business, a shop, or a school.

Engage the community

Robotics demonstrations and STEM activities at local events, where our students show their work and give back.

Something else

This list is only what we have thought of so far. If you see another way to help, that is the interesting conversation.

Goods, services, and expertise are recognized at the same levels as cash sponsorship. The levels are listed at colmaroboticsfoundation.org/sponsor/.

START A CONVERSATION

Tell us what you have in mind and we will follow up. No commitment, and no obligation to give money.
